Gentlemen

This letter is a follow-up to our meeting held on August 19, 1993, to discuss the baseline risk assessment issues listed in your August 12, 1993 letter to the U S Department of Energy/Rocky Flats Office (DOE/RFO). At this meeting, DOE/RFO agreed to prepare a "strawman" methodology based on Dr Richard Gilbert's July 30, 1993, report as well as comments on the report from the U S Environmental Protection Agency, Region VIII (EPA), Colorado Department of Health (CDH) and DOE RFO. In order to have the "strawman" methodology completed by September 15, 1993, we will need to receive formal comments from EPA and CDH no later than September 8, 1993.

We propose to meet and discuss the "strawman" methodology during the week of September 20, 1993. Please contact Bruce Thatcher of my staff at 966-3532 regarding the availability of your staff members for this meeting.

In addition, we are informing you that on September 9, 1993, we will make available risk assessment staff members from Los Alamos National Laboratory and Fernald to discuss data aggregation. Staff members from these DOE facilities are being made available in order to assist EPA and CDH in the resolution of this issue. We request that EPA make one of their regional toxicologists available for this meeting to present the Region VIII protocol for data aggregation. Also, we request that this meeting be held at the EPA 2nd floor conference center if possible.

Any questions or concerns regarding this letter should be addressed to Bruce Thatcher of my staff.

Sincerely,

Richard J Schassburger  
Acting Director  
Environmental Restoration Division
